

PULITORE

ELETTRO

INIETTORI

CLEANER OF THE SYSTEM OF INJECTION GASOLINE

It cleans injectors, valves and room of combustion eliminating the encrustations and the so-called phenomenon of the "pulsation in head."

It restores the power and the bright answer of the motor.

It improves the lighting and the performances of the motor.

It reduces the harmful issues (CO and HC).

The product is ready to the use, it is compatible with the catalyst and it is usable for the cleaning of all the systems of injection:

- Single Point - Multi Point - K - KE - L - LE etc.

EMPLOYMENT: *CLEANER ELECTROINJECTORS must exclusively be used with the special apparatus "Fuel Sistem Clean".*

The duration of a treatment is of about 20 minutes and is advisable to repeat the treatment every 30.000 km.

PROFESSIONAL USE

BOXES OF:
- 16 bottles of lt.1

*RESERVED TO THE
TECHNICIANS OF THE INJECTION*

**PROFESSIONAL PRODUCT FORMULATED TO
CLEAN THE SYSTEM OF INJECTION GASOLINE
WHILE THE MOTOR IS IN OPERATION**

**CLEANER ELECTROINJECTORS IN THE TURN
OF FEW MINUTES:**

*It perfectly cleans the system of injection from
the carbonaceous and resinous deposits.*

OCTANE 115

ADVANCED TECHNOLOGY FOR
SUPER AND GREEN PETROL

Newly conceived additive with extremely anti-explosive and detergent qualities.

It increases the level of octane in the petrol with lead or not, and it has an efficacious cleaner consequence for injectors and carburetors.

One liter of OCTANE 115 additives from 10 to 200 liters of petrol according to the exigency of octanes increase.

NO TETRAHETIL LEAD

BOXES OF:

- 16 bottles of lt.1
- 46 bottles of ml.250

OCTANE RACING

ADVANCED TECHNOLOGY
FOR SUPER AND GREEN PETROL

for competitions

+ PERFORMANCES
+ POWER
LOWER
TEMPERATURES

Newly conceived additive expressly studied in order to increase the octane level in super and green petrols.

Using in percentage variable from 2,5% to 20%. OCTANE RACING, thanks to its special formula, increases the performances and reduces the temperatures of operation of engines either at 2 or at 4 strokes.

BOXES OF:

- 16 bottles of lt.1
- 46 bottles of ml.250

SISTEMA BENZINA

VERY CONCENTRATED
TREATMENT FOR
APPARATUS OF
PETROL INJECTION

is not an additive for petrol but a very concentrated professional treatment for the cleaning and the lubrication of the petrol engines injection system.

Indeed, thanks to its *Special Formula of Total Control of Sediments*, it cleans the inside of the injection system, such as:

- **Elettro-Injectors**
- **Combustion chamber**
- **Valves**
- **Intake commutator**
- **Carburetors**
- **Exhaust lights**

A regular and systematic use:

- Improves the performances
- Improves the fuel economy
- Reduces the emissions
- Reduces the carbon sediments
- Avoids the detonation
- Minimizes the hesitations at start

INSTRUCTIONS:

- 1) Pour the whole contents of the bottle in the half-empty petrol tank.
- 2) Add about 50 liters of petrol.
- 3) Repeat the treatment every 5.000-10.000 km. or every changing of oil.

BOXES OF:

- 46 bottles of ml.250

PROFESSIONAL USE
